SUMMARY

Product Designer and Engineer with 2+ years of experience designing and building digital products, from user research and product design through development and production. I've taken multiple AI-powered products from concept to real users; translating user needs into thoughtful product experiences, and building them into functional, production-ready code myself. The combination of design thinking, technical execution, and end-to-end ownership is what I bring to the table.

SKILLS

- **Product & Design:** Product Strategy, Product Discovery, User Research, UI/UX Design, Wireframing, Prototyping, Design Systems, Accessibility, MVP Planning, Information Architecture, Interaction Design, Responsive Design
- **Product Engineering:** React, Next.js, TypeScript, Tailwind CSS, React Native, Expo, Supabase, Prisma ORM, PostgreSQL, Neon Console, Next Auth
- **Tools & Design Software:** Git & GitHub, Vercel, Figma, Framer, Cursor, AI-Assisted Development, Prompt Engineering, AI Product Workflows
- **Soft Skills:** Team leadership, Cross-functional Collaboration, Communication, Problem-Solving, Adaptability, Ownership & Accountability, Attention to Detail, Time Management

PROFESSIONAL EXPERIENCE

PRODUCT DESIGNER, ENGINEER

Lagos, Nigeria

FREELANCER

2024 - Present

- Designed and engineered AI-powered products from product discovery through deployment using Next.js, React, TypeScript, Tailwind CSS, and modern frontend architecture.
- Led product discovery, user research, wireframing, prototyping, design systems, and frontend implementation across multiple products.
- Leveraged AI-assisted development workflows to accelerate development, documentation, debugging, and iteration while maintaining production quality.
- Built reusable design systems and component libraries to improve consistency, scalability, and developer experience.

PRODUCT DESIGNER, ENGINEER

Lagos, Nigeria

MEDQUIRE

April 2026 - Present

- Collaborating with a 3-person founding team on an early-stage AI healthtech product that translates medication information into plain language.
- Led product discovery and user research, and built the product's design system from scratch.
- Took the MVP from information architecture through high-fidelity screens; active waitlist launched June 2026, ahead of Play Store/App Store release.

PRODUCT DESIGN INTERN

Lagos, Nigeria

PAGE INNOVATION LIMITED

Jan 2025 - May 2025

- Designed the notification screen for Contrisave, a live savings product; making key decisions on how notifications were structured and displayed to users, as a real product deliverable rather than a practice exercise.
- Conducted user research, created wireframes and high-fidelity prototypes, and led usability testing to validate design decisions before developer handoff.

FEATURED PROJECTS

- [Plateup](#) | **AI Meal Planning Platform**
Led design and engineering end-to-end; 60+ signed-up users planning meals around real budgets.
- [SellSnap](#) | **Link-Based Commerce Platform**
Designed and built the full merchant flow; onboarding, dashboards, payment links, order tracking.
- [SecureGate](#) | **Authentication Platform**
Designed and built a secure, production-grade authentication system with JWT auth, verification, role-based access.
- [MedQuire](#) | **Digital Health Platform**
Co-founding and shaping product direction for a healthcare app in development for Play Store and App Store launch.

CERTIFICATIONS

- **Product Design Certification** | VivaKing Bootcamp
- **Product Design Certification** | Page Innovation Academy
- **Product Engineering Certification** | DevsandDesign UI/UX Bootcamp
- **MVP Builder Certification** | DevsandDesign AI-Assisted Development and Product Thinking Bootcamp
- **Digital Marketing Certification** | HubSpot Academy

EDUCATION

- **BSc Psychology** | Lagos State University Completed (2023)
